BAYRAM ŞAHİN  *

This issue of International Journal of Maps in Mathematics is dedicated to the memory of Professor Krishan Lal Duggal. Dr. Krishan Lal Duggal passed away peacefully on December 1 st of 2023 at 92 years of age.

FIGURE 1. Professor Krishan L. Duggal and me at Windsor University

Professor Krishan Lal Duggal was well known for his passion of Mathematics and he inspired greatness and guided all he had contact with in achieving their goal of learning. Greatly respected in his field, he authored and published numerous books and research papers. He was an avid musician in his free time singing Bhajans and playing the sitar and harmonium.

I was familiar with Professor Duggal's publications. But I met him face to face in 2003, when I had the opportunity to be his post-doctoral student at the University of Windsor, Canada. We co-authored many research papers with Professor Duggal, and we also co-authored the book titled "Differential Geometry of Lightlike Submanifolds" published by Springer in 2010.

I will remember Professor Duggal with respect and gratitude. I will also remember him saying "The sky is not too high".

EGE UNIVERSITY, FACULTY OF SCIENCE, DEPARTMENT OF MATHEMATICS, 35100, İZMİR, TÜRKİYE
